GENERAL INFORMATION:
APPLICANT: SHYUR, LIE-FEN
APPLICANT: YANC, JUI-LIN
APPLICANT: YANC, NING-SUN
TITLE OF INVENTION: A TRUNCATED FORM OF FIBROBACTER SUCCINOGENES 1, 3-1,
TITLE OF INVENTION: THERMO-TOLUCANASE WITH IMPROVED ENZYMATIC ACTIVITY AND
TITLE OF INVENTION: THERMO-TOLERANCE
FILE REFERENCE: 4910-8
CURRENT APPLICATION NUMBER: US/09/654,652A
CURRENT APPLICATION NUMBER: US/09/654,652A
CURRENT FILING DATE: 2000-09-05
NUMBER OF SED ID NOS: 11
SOFTWARE: Patentin Ver. 2.1
SEQ ID NO 2
LENGTH: 267
TYPE: PRT
ORGANISM: Artificial Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            밁

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               licheninase (EC 3.2.1.73) precursor - Bacillus subtilis N;Alternate names: 1.3-1.4-beta-D-glucan 4-gluconohydro
                                                                                                                                                                                                                        catalyzes the hydrolysis of 1,4-beta-D-glucosidic bonds in
